Profile

As a Computer Science graduate with hands-on experience in web development, I specialize in building efficient and scalable web applications. My work focuses on delivering clean, maintainable code and user-centric designs that meet both business and technical requirements. I'm skilled in a range of modern technologies and continuously seek to refine my approach to solving complex problems

Professional Experience

Junior Software Developer,

Simplex Software & Internet Services Ltd

October 2023 – present | Limassol, Cyprus

Responsible for maintaining and supporting legacy PHP-based websites, including content updates and code enhancements, while providing customer support. Led the development, maintenance, and deployment of new web applications using Node.js and React.js. Successfully delivered three projects as the sole developer: a website for renting co-working spaces, the company's main website, and a citizen registry for displaced refugees, each with its own management system. Additionally, handled the deployment of the company's payment platform.

Education

BACHELOR'S DEGREE - APPLIED INFORMATICS,

University of Macedonia

October 2018 – January 2023 | Thessaloniki, Greece

Computer Science degree focused on the development and practical application of technical skills, with an emphasis on research and practical experience across various domains.

MILITARY SERVICE, *Cypriot National Guard*

July 2017 – September 2018

HIGH SCHOOL DIPLOMA, *Saint Spyridon Lyceum*

September 2014 – June 2017 | Limassol, Cyprus
